4. Findings

The hub was received in its original retail box with the inner tray intact. The outer sleeve had been opened along the tab; no tape or cutting damage was observed. The housing is clean with no scratches, dents or marks on the connectors.

Functional test on the standard test host (USB-C laptop, 65 W charger): HDMI output at 4K/30 Hz, both USB-A ports, USB-C data, SD and microSD readers and power-delivery pass-through all operated correctly. Ethernet negotiated at 1 Gbps.

The customer's stated reason is change of mind and no defect was claimed, so there was no defect to verify. The result code is recorded as INCONCLUSIVE only because the defect-verification step is not applicable; no exceptions were found.

5. Recommended next step

No inconsistencies found. The request was raised 5 days after delivery, inside the 30-day accessories window (POL-ACC-2024-01). Eligible for standard resolution; refund requires analyst approval. Grade for open-box resale (grade A).

Result codes (SOP WH-INS-07): PASS = inspection protocol completed and claim-relevant findings are conclusive; FAIL = findings do not support the claim as stated; INCONCLUSIVE = findings cannot be confirmed without further verification. Product condition codes follow the warehouse grading scale (new, like_new, open_box, damaged, defective, unsafe, for_parts).
