4. Findings

The air purifier arrived in the original carton, which shows crush marks on two corners and a split along the top flap. The delivery record for O104 contains the carrier note: "Carton crushed; visible impact damage on delivery scan."

Product: the front grille is cracked across the lower third and the left side panel has an impact dent about 4 cm wide. The damage pattern matches the crushed carton corners, which points to an impact in transit and not to use.

On power-up the fan runs but rattles at speeds 2 and 3 because the grille rubs the impeller. Filters and the remote control are present. Damage verified (defect verified: Yes).

5. Recommended next step

Damage confirmed and consistent with the recorded delivery issue. Investigation case 2 (delivery_dispute) remains open for the logistics claim under POL-DMG-2024-04. Refund value INR 12,999.00 is above INR 10,000 and requires returns supervisor approval. Recovery: supplier return or parts harvest; not resaleable as new.

Result codes (SOP WH-INS-07): PASS = inspection protocol completed and claim-relevant findings are conclusive; FAIL = findings do not support the claim as stated; INCONCLUSIVE = findings cannot be confirmed without further verification. Product condition codes follow the warehouse grading scale (new, like_new, open_box, damaged, defective, unsafe, for_parts).
