4. Findings

Serial EL5520 on the hub matches the order line for O105. The hub is clean, with no physical damage, bent connectors or cable strain.

Defect reproduced: with a 65 W charger connected to the USB-C PD input, the host laptop did not charge in 3 of 3 attempts, and the HDMI output dropped every few minutes during a 20-minute test. All other ports worked.

The fault is consistent with a manufacturing defect in the power-delivery circuit (defect verified: Yes).

5. Recommended next step

Defect verified. Within the 30-day accessories window (requested 12 days after delivery). Refer for warranty review and supplier return to the accessories supplier (see supplier defect report for the FlexFit USB-C hub PD

fault). A refund requires analyst approval.

Result codes (SOP WH-INS-07): PASS = inspection protocol completed and claim-relevant findings are conclusive; FAIL = findings do not support the claim as stated; INCONCLUSIVE = findings cannot be confirmed without further verification. Product condition codes follow the warehouse grading scale (new, like_new, open_box, damaged, defective, unsafe, for_parts).
