## 4. Findings

The hub was received in its retail box with all packed items. No serial is recorded for this order line, so identity was confirmed by model and packaging.

Defect reproduced: no HDMI signal on two different monitors and two cables. USB-A and USB-C data ports work. Power-delivery pass-through works.

Condition: defective; accessories complete; defect verified: Yes.

## 5. Recommended next step

Defect verified and inside the return window (7 days after delivery). Before any refund action, the refunds ledger must be checked for an existing completed refund on R106, because only one completed refund is allowed per

return.

Result codes (SOP WH-INS-07): PASS = inspection protocol completed and claim-relevant findings are conclusive; FAIL = findings do not support the claim as stated; INCONCLUSIVE = findings cannot be confirmed without further verification. Product condition codes follow the warehouse grading scale (new, like_new, open_box, damaged, defective, unsafe, for_parts).
