4. Findings

First inspection of the HomeHive Air Purifier 300 returned under R110 (reason: not_functioning). No serial is recorded on the order line; identity was confirmed by model, rating label and packaging.

The motor assembly is functional: the fan starts and holds all three speeds. The fault reported by the customer was reproduced in the control and sensor circuit. The unit shut down after 6-8 minutes of operation with error code E3 on the display, in 3 of 3 test cycles.

Conclusion of this inspection: defect verified (Yes). Result PASS. Probable cause is the air-quality sensor or the control board.

5. Inspector system note (verbatim from inspection record)

"Initial inspection indicates functional motor assembly."

6. Recommended next step

Defect verified by this inspection. Recommend warranty review and supplier return for sensor/control-board analysis. Refund value INR 12,999.00 is above INR 10,000 and requires supervisor approval.

Result codes (SOP WH-INS-07): PASS = inspection protocol completed and claim-relevant findings are conclusive; FAIL = findings do not support the claim as stated; INCONCLUSIVE = findings cannot be confirmed without further verification. Product condition codes follow the warehouse grading scale (new, like_new, open_box, damaged, defective, unsafe, for_parts).
