Price paid	INR 1,899.00

3. Condition summary

Product condition	new
Accessories expected	brand tags, spare button, garment bag
Accessories complete	Yes
Defect verified	No
Inspection result	INCONCLUSIVE

4. Findings

The item received is a new, unworn shirt with tags attached, which matches the catalogue line item for O114: UrbanWeave Classic Cotton Shirt (product P_R114, category fashion).

The return record gives the reason size_color_incorrect. The inspector's system note reads verbatim: "Return reason references size mismatch but line item is accessory SKU." The catalogue shows the line item as a fashion SKU, not an accessory, so the return record, the system note and the order line do not agree.

Size and colour on the garment were recorded from its labels for the analyst. No defect was assessed (defect verified: No).

5. Inspector system note (verbatim from inspection record)

"Return reason references size mismatch but line item is accessory SKU."

6. Recommended next step

Data correction needed: investigation case 6 (data_correction) is open. The analyst should reconcile the return reason, the line item and the system note before deciding the return. Additional verification required.

Result codes (SOP WH-INS-07): PASS = inspection protocol completed and claim-relevant findings are conclusive; FAIL = findings do not support the claim as stated; INCONCLUSIVE = findings cannot be confirmed without further verification. Product condition codes follow the warehouse grading scale (new, like_new, open_box, damaged, defective, unsafe, for_parts).
