Fashion and Textile Re-commerce and Recycling Guideline

ShopSphere Retail - apparel, footwear and textile accessories

Guideline ID	RFB-TX-2025-01
Version	1.2
Effective date	2025-04-15
Category	fashion
Recovery methods	resell_new, open_box_resale, refurbish_and_resell, supplier_return, recycle

1. Resell as new

Unworn, unwashed items with all brand tags attached and the original SKU label are re-tagged where needed, steamed and returned to stock (resell_new).

2. Items that cannot be resold

- Hygiene-sealed items (innerwear, swimwear, socks) with a broken seal go to recycle.
- Worn, washed or perfumed items go to textile recycle. Items with stains go to recycle.
- Items with a SKU label mismatch are held until the investigation case is resolved, then re-labelled and returned to stock.

3. Minor repair

Loose buttons and short seam openings (under 2 cm) on otherwise new items may be repaired in-house and sold as open-box (open_box_resale).

4. Recycling partners

Textile recycling is done through partners certified under the Global Recycled Standard. Each batch is logged with a recycling certificate.
