Supplier Defect Report - HomeHive Air Purifier 300: thermal damage at power inlet

SDR-2026-031 | Choudhury, Bakshi and Maharaj (S001)

Report ID	SDR-2026-031
Report date	2026-03-16
Supplier	Choudhury, Bakshi and Maharaj (S001)
Supplier contact	supplier1@shopsphere.invalid
Supplier category	home_appliances
Products	HomeHive Air Purifier 300 (P_R104, P_R110, P_R115)
Batch / lot codes	HH-AP300-B2602, HH-AP300-B2603
Severity	Critical (safety)
Prepared by	Returns Quality Analytics, ShopSphere Retail

1. Summary

A returned HomeHive Air Purifier 300 (serial HA9933, return R115) showed scorch marks and melted plastic around the power inlet, and failed the insulation resistance test. The unit is quarantined. Because this is a safety-relevant failure, ShopSphere requests an immediate containment review of the affected lots.

2. Return evidence (from ShopSphere order and inspection systems)

Return	Order	Reason	Requested	Inspection	Defect verified
R115	O115	defective	2026-03-10	pass (unsafe)	Yes

3. Recurring defect analysis

- Failure location: power inlet housing and adjacent wiring. Thermal discolouration suggests a high-resistance joint at the inlet terminals.
- Customer report: burning smell during normal use; customer stopped use immediately.
- No other HomeHive units in the current return population show thermal damage, but the severity justifies lot-level containment.

4. Requested supplier actions

- Provide inlet terminal crimp/solder process records for lots HH-AP300-B2602 and HH-AP300-B2603 within 48 hours.
- Submit an 8D report with root cause and containment within 10 business days.
- Confirm whether a field safety notice is required.
- Do not request the quarantined unit back for refurbishment; it is reserved for recycle/dispose after evidence capture.

5. Commercial handling

Units with a verified defect are held for return-to-vendor (supplier_return) against the batch codes above. Units with conflicting or missing inspection evidence are excluded from any chargeback until the inspection evidence is complete.
